SUBMERSIBLE PUMPS

## Elettropompe sommergibili con girante bicanale centrifugo

### Submersible electro pumps with centrifugal twin channel impeller

Potenze / Power:	<b>12÷42 kW</b>
Mandate / Delivery:	<b>DN80-100</b>

#### Impieghi

La serie ATH 2 poli trova impiego nel pompaggio e nella movimentazione di grandi quantità di liquidi chiari e parzialmente fognari ad altissime prevalenze.

Applicazioni: depuratori, canalizzazioni industriali, fognature, strutture aeroportuali, ospedaliere e civili, nell'agricoltura e irrigazione.

#### Caratteristiche

Tutti i componenti principali sono realizzati in Ghisa GG25. Due tenute meccaniche separate (lato motore a bagno olio, lato girante a contatto con il liquido) e componentistica di prima qualità, ne garantiscono il perfetto funzionamento.

#### Motori

- Motori asincroni 2 poli con rotore a gabbia di scoiattolo
- Protezione termica T1 e T2 incorporato nel motore da collegare ad un apposito quadro di comando
- Isolamento statore classe F (155°C)
- Grado protezione IP 68

#### Raffreddamento

Raffreddamento effettuato dal liquido nel quale la pompa è immersa.

#### Limiti di impiego

- Temperatura massima del liquido: 40°C con unità completamente sommersa
- Disponibili versioni speciali (escluso ATEX) fino alla temperatura liquido di 60°C con unità completamente sommersa, non a servizio continuo (S1)
- Massima profondità di immersione: 20 mt
- Valori pH ammessi: 6-10
- Caratteristiche idrauliche valide per liquidi di densità <1,1 kg/dm<sup>3</sup>
- Tensioni ammesse: 230/400V o 400/690V ±5% a seconda del modello
- Frequenza ammessa: 50Hz ± 2%

#### Applications

The ATH 2 poles Series is used to move large volumes of clear water or light sewage with high performance.

Applications: water treatment plants, industrial plants, airports, hospitals and civil applications and agricultural irrigation.

#### Characteristic

All main components are made of grey cast iron GG25. Two individual mechanical seals (motor side in the oil chamber, impeller side in contact with the liquid) and high quality parts, ensure the perfect functioning and reliability of the product.

#### Motor range

- Squirrel cage motor at 2 poles
- Thermal protection T1 and T2 embedded in the motor winding (to be wired to the three pole contactor in the control panel)
- Class F insulation (155°C)
- IP 68 protection

#### Motor cooling

The cooling of the motor is ensured by the liquid where the pump is submerged.

#### Limits of use

- Max. permissible liquid temperature: 40°C with pump fully submerged
- On request, special version (excluded ATEX) to withstand liquid temperature up to 60°C with pump fully submerged, no S1 service
- Maximum depth of immersion: 20 mt.
- Permissible pH value: 6-10
- Hydraulic features suitable for liquids with density <1,1 kg/dm<sup>3</sup>
- Allowed voltage: 230/400V or 400/690V ±5% depending on the pump
- Allowed frequency: 50Hz ±2%

## Tecnologie e Soluzioni

### Technology and Features

#### Giranti

La serie monta giranti bicanali centrifughi che sono in grado di trasferire al liquido pompato elevate pressioni e prevalenze. Passaggi solidi fino a 45mm.

#### Impellers

The ATH centrifugal double-channel impeller are suitable for pumping large flow at very high pressure with free passage of solids up to 45 mm.

#### Pompe antideflagranti / Explosion proof pumps

CE 0477  II 2 G EX db k IIB T4 X 0°C ≤ Ta ≤ 40°C  
EX db IIB T4 X 0°C ≤ Ta ≤ 40°C

I presenti certificati garantiscono la sicurezza contro le esplosioni, in assoluta conformità con le stringenti direttive europee ed internazionali ATEX/IECEx.

*These certificates grant for the safe use of the product in hazardous area in line with the stringent European and International standards ATEX/IECEx.*

#### Sensore d'umidità

Sensore conforme alle norme sulla sicurezza integrata contro le esplosioni EN 60079-0, EN 60079-1 tramite barriera di protezione. Di serie su tutta la gamma (non applicabile con IECEx).

#### Seal leak detector

The seal leak detector is certified according to the norm through safety barrier EN 60079-0, EN 60079-1 and fitted. Standard on all series (not applicable with IECEx).

#### Cuscinetti

La serie monta il cuscinetto superiore a rulli cilindrici, atto ad assorbire e resistere ad eventuali sollecitazioni trasmesse dall'albero motore.

#### Bearings

The series is fitted with a cylindrical roller bearing (upper bearing) to absorb the thrust and vibration generated by the pump shaft.
